BaShaar
Academic Community for Israeli Society

Invest in Israel's Future: Support BaShaar*

Amidst unprecedented challenges, Israel stands at a critical juncture. While safeguarding borders is vital, nurturing its societal fabric is equally essential.

Established in 1999 by senior faculty members, BaShaar is a non-political organization with over 2,000 members from all Israeli academic institutions.

Its members work tirelessly on a voluntary basis to promote Israel's core values as manifested in its Declaration of Independence, uphold academic values and ethos, and improve access to higher education for the underprivileged, thereby strengthening Israeli society.

*BaShaar in Hebrew means "at the gate," signifying BaShaar's role and commitment to preserving and promoting the higher education system, which is one of the cornerstones of Israeli society.

How BaShaar Makes a Difference:

BaShaar operates through two main channels:

1. Public-Academic – Academia is one of the pillars of a liberal-democratic society, deeply rooted in its values and ethos. Our mission is to safeguard and instill these values through initiatives like The Forum for Higher Education, Bashaar-Academia-Network, position papers, and a hotline for safeguarding academic freedom.

2. Educational Outreach – Directing efforts to various communities, particularly in Israel's periphery, including educational support for displaced students post-October 7th. Our special educational support initiative, which focuses on high school students from displaced communities in the north and south of Israel due to the war, won first prize in the "Education Initiatives in Time of Emergency" competition.
